ABERNATHY, ROSALIND (Roz Abernathy)

DOB: 12/05/1951 Sex: Female MRN: 9184255 PMS ID: 6673012 Home: (615) 555-0117
Date of Service: 04/22/2025 Provider: Yusuf Halloran, DO

CURRENT MEDICATIONS

alendronate — Oral
calcium carbonate — Oral
vitamin d3 — Oral

ALLERGIES

No Known Drug Allergies

LOCATION

Cumberland Brentwood

CHIEF COMPLAINT

Right hip pain and stiffness, worsening over 1 year.

HISTORY OF PRESENT ILLNESS

Patient reports gradually worsening right groin and lateral hip pain over the past year, now limiting her ability to walk more than two blocks and causing difficulty rising from a seated position. Pain is worse with weight bearing and improves with rest. No fall or injury. Has been using a cane intermittently.

VITALS

BP	Pulse	Resp	O2 Sat	Temp	Ht (in)	Wt (lbs)	BMI	BSA
142/84	80	18	96	98.0	63.0	168.4	29.8	1.82

PHYSICAL EXAM

Right hip: antalgic gait, decreased and painful internal rotation, positive FABER test. No groin swelling or warmth. Pulses intact distally, no lower extremity edema.

IMAGING

XR pelvis and right hip (right) — performed 04/22/2025
Two views of the pelvis and right hip. Severe joint space narrowing of the right hip with subchondral sclerosis, osteophyte formation, and superior migration of the femoral head. Left hip shows mild degenerative change.
Impression: Severe right hip osteoarthritis.

ASSESSMENT

- Severe right hip osteoarthritis (M16.11) [Primary]

PRESCRIPTIONS

acetaminophen 650 mg tablet — PO
Sig: Take 1 po tid
Quantity: 90.0 Tablet Refills: 2 Action: new

PLAN

Radiographs confirm advanced right hip osteoarthritis. Discussed conservative management including activity modification and weight bearing as tolerated, and started scheduled acetaminophen. Reviewed eventual total hip arthroplasty as a future option if conservative measures fail. Continue alendronate for osteoporosis.

Follow up in 5 weeks

CURRENT MEDICATIONS

alendronate — Oral
calcium carbonate — Oral
vitamin d3 — Oral

ALLERGIES

No Known Drug Allergies

LOCATION

Cumberland Brentwood

CHIEF COMPLAINT

Follow-up right hip osteoarthritis, persistent pain despite acetaminophen.

HISTORY OF PRESENT ILLNESS

Patient returns reporting continued right hip pain despite scheduled acetaminophen, now rating pain 6/10 and affecting sleep. She has not tolerated increasing activity as hoped. No new falls or trauma.

VITALS

BP	Pulse	Resp	O2 Sat	Temp	Ht (in)	Wt (lbs)	BMI	BSA
					63.0	170.0	30.1	1.83

* Patient Reported

PHYSICAL EXAM

Right hip: continued antalgic gait, painful internal rotation, FABER positive. No acute distress.

ASSESSMENT

- Severe right hip osteoarthritis (M16.11) [Primary]

PRESCRIPTIONS

celecoxib 200 mg capsule — PO
Sig: Take 1 po qd
Quantity: 30.0 Capsule Refills: 1 Action: new

PLAN

Given inadequate relief with acetaminophen, transitioning to scheduled celecoxib with renal function monitoring given her age. Reinforced hip precautions and continued weight-bearing exercise as tolerated. Will refer for orthopedic surgical consultation if no improvement by next visit.

Follow up in 3 months
